- Budget Management
- Strategic Thinking
- Attention to Detail
- Web Development
- Digital Marketing
- Content Creation Tools
- Scripting and Automation
- Spreadsheet & Coding

Professional Experience

- Front-End Web developer

freelance | November 2022 - Present

As a Front-End Freelance Developer, I have had the privilege of working on a diverse range of projects, improving my skills in web development and gaining expertise in various technologies:

- **HTML/CSS/SCSS:** Crafting visually appealing and responsive user interfaces is at the core of my work. I'm proficient in HTML and CSS, with experience in SCSS for streamlined stylesheets.
- **JavaScript:** I am passionate about creating dynamic and interactive web applications. My proficiency in JavaScript allows me to build feature-rich front-end solutions that engage users and enhance their experience.
- **Java:** Object-Oriented Programming (Java OOP) with an emphasis on efficient and well-structured code used in with hibernate/JDBC in Spring framework.
- **Git:** Effective collaboration and version control are crucial in modern software development. I use Git for managing and tracking changes in my projects, ensuring seamless teamwork and code stability.
- **Continuous Learning:** Currently enhancing my web development skills with a focus on React.js through online courses and self-study.

- Digital Marketing Manager

nda | September 2020 - November 2022

- **Digital Marketing Management:** Oversaw and maintained the well-being of multiple Facebook accounts, ensuring optimized performance and brand consistency. Handled multiple landing pages, ensuring seamless user experiences by leveraging expertise in HTML and CSS.
- **Content Creation & Editing:** Designed and prepared advertisement materials using DaVinci Studio Resolve and Photoshop, tailoring each piece to fit the desired marketing platform. Automated content and design processes using Windows Shell scripts, streamlining workflow and improving operational efficiency.
- **Budget Management & Tracking:** Developed a custom-made tracking application in Google Sheets, using JavaScript to provide real-time updates on budget spend and campaign returns. Ensured all marketing activities remained within the allocated budget, maximizing profitability and ensuring cost-efficient strategies.

- Civil Engineer

Arad Real Estate Development | March 2018 - March 2020

- Designed AutoCAD drawings to help engineers and builders perform their work on site.
- Quality Surveyor - Performed on-site field surveys and designed technical narratives to document processes and design changes.
- Quantity Surveyor - Performed measurements for structural and architectural works to prepare cost estimates for projects.
- Worked with architects, engineers and customers to efficiently resolve planning and construction issues.

- Collaborative Teamwork
- Problem Solving

- Trained junior staff on codes, best practices and suppliers, which enabled better self-sufficiency and task completion.

Education

November 2019 - November 2020

Information Technology Java Developer

Software Development Academy , Arad

- Have learned in Java Object-Oriented Programming (Java OOP) with an emphasis on efficient and well-structured code.
- Skilled in database management using MySQL and JDBC, ensuring data integrity and efficient data retrieval for Java-based applications.
- Competent in designing visually appealing and responsive user interfaces with HTML and CSS.
- Experienced in developing dynamic and interactive web applications using Angular, a popular front-end framework.
- Well-versed in the Spring Framework, enabling the development of enterprise-level applications with modules for dependency injection, MVC, and data access.
- Equipped with a full-stack development skill set to design, build, and maintain sophisticated software solutions that bridge the gap between back-end and front-end development.

September 2009 - July 2015
